Martin R. Franke

Martin Franke is the Director, Information Technology and Security, and Chief Information Officer for IDA. He leads a team of more than 190 IT and Security professionals responsible for a broad range of solutions and services. His directorate includes an enterprise-wide knowledge service center, a systems development unit, an enterprise operations and help desk group, an information security team and an industrial security team.

Prior to joining IDA in June 2007, Martin was responsible for criminal justice programs at the nonprofit research corporation Noblis. While there, he guided FBI officials as they applied software and systems engineering to the management of programs, projects and acquisition processes.

From 1999 to 2005, he served as an executive director at the national headquarters of the American Red Cross. Martin led a 150-person systems integration and software development organization in creating information technology solutions that directly supported the organization's relief and humanitarian operations.

In previous professional assignments, Martin managed a $14-million-a-year consulting practice at Watson Wyatt Worldwide, and he supported NASA programs as an analyst and network manager with the Lockheed Martin Corporation.

Martin obtained a master's degree in technical management from Johns Hopkins University and a bachelor's degree in computer science from Loyola University Maryland.

About IDA

IDA is a nonprofit corporation that operates three federally funded research and development centers in the public interest. IDA answers the most challenging U.S. security and science policy questions with objective analysis leveraging extraordinary scientific, technical and analytic expertise.
