PJ Lee Receives 2021 President's Award for Contributions to IDA

ALEXANDRIA, VA (July 2022) – PJ Lee, computer systems support administrator in IDA's Information Technology and Security Directorate at IDA's Alexandria, VA headquarters, was presented with the 2021 President's Award for Excellence.

This award recognizes superior performance by staff members who contribute significantly to IDA's success.

"PJ made significant contributions through his work before, during and after the Potomac Yard relocation," says IDA President Norty Schwartz. "His efforts were instrumental in the successful move and critical to IDA's success."

While IDA was maintaining both the Mark Center and Potomac Yard facilities, Lee made daily trips back and forth between the buildings to search for missing IT equipment, manage technical support for meetings at Mark Center, and sort and dispose of equipment. Following the move, Lee provided staff with the highest level of support. Bringing creative solutions to address supply chain issues, he researched, tested and deployed the systems that are currently running IDA's virtual meeting rooms and hybrid meeting environments. Lee was integral to configuring and deploying IDA's video conferencing solutions from Mark Center to Potomac Yard.

"I am honored to receive this recognition from IDA," said Lee. "Contributing to the successful move to Potomac Yard provided me with an opportunity to implement innovative solutions to support our staff during and after the transition."

Lee earned his bachelor's degree in mechanical engineering technology from Pennsylvania State University in 2010.

IDA is a nonprofit corporation that operates three federally funded research and development centers in the public interest. IDA answers the most challenging U.S. security and science policy questions with objective analysis leveraging extraordinary scientific, technical and analytic expertise.
